

## XAML

```
<Window>

  <Grid>
    <Button Title="Hello" />
  </Grid>

</Window>
```

```
Window window1 = new Windows() { Title = "Hello Title" };
Grid grid1 = new Grid();
grid1.Children.Add(new Button());
grid1.Children.Add(new Button());
grid1.Children.Add(new Button());
window1.Children.Add(grid1);
```
